

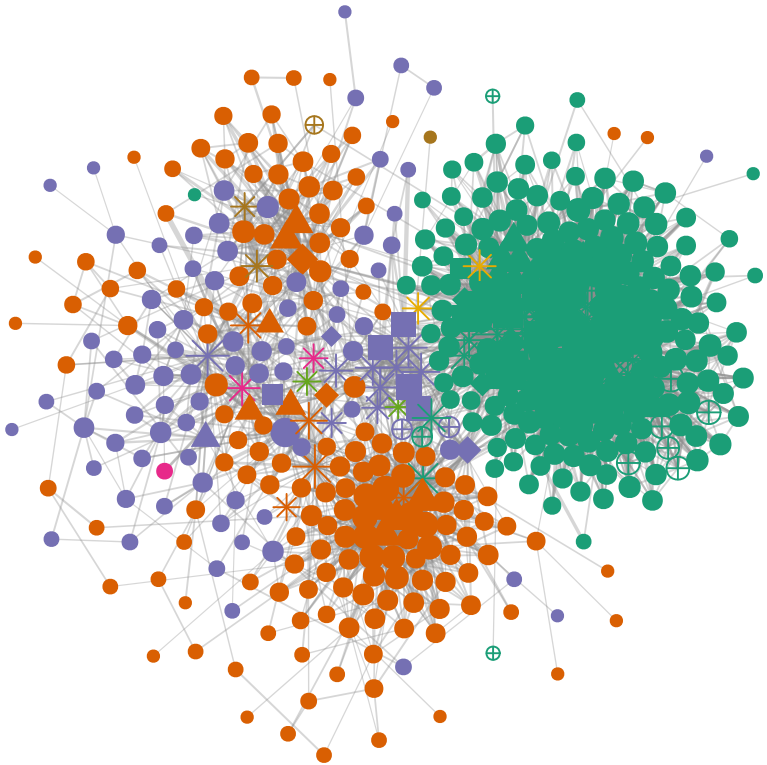

Figure 1. Potato seed-exchange networks and summary metrics

Nonstress network

Nonstress — summary metrics

Nodes	527
Edges	4,186
Density	0.015
Reciprocity	0.183
Mean degree (total)	15.89
Degree centralization	0.139
Mean betweenness	0.006
Components (weak)	1
Largest component	527
Mean path length	76.48
Transitivity (global)	0.177
Assortativity (region)	0.783
Assortativity (type)	-0.008
Total volume (kg)	106,528
Mean edge volume (kg)	25.4

- 100
- 150
- 200
- 250

Stress network

Stress — summary metrics

Nodes	450
Edges	4,056
Density	0.020
Reciprocity	0.123
Mean degree (total)	18.03
Degree centralization	0.153
Mean betweenness	0.007
Components (weak)	1
Largest component	450
Mean path length	94.55
Transitivity (global)	0.164
Assortativity (region)	0.769
Assortativity (type)	-0.005
Total volume (kg)	106,864
Mean edge volume (kg)	26.3
